

MUHAMMAD TALHA

Software Engineer | PHP Laravel Developer

Lahore, Pakistan | +92 340 3409744 | muhammadtalha.codes@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with 3 years of professional experience building and optimizing production web applications and REST APIs using PHP and Laravel across e-commerce, B2B, HR, and workflow platforms. Experienced in backend architecture, database and query optimization, payment and shipping integrations, webhooks, queues, search infrastructure, automated testing, and production troubleshooting. Hands-on full-stack experience with React, Next.js, and TypeScript. Reduced a production product-detail API from ~6 seconds to ~1.5 seconds and migrated product search from Algolia to self-hosted Meilisearch, reducing search response time and eliminating approximately \$100/month in recurring search costs.

TECHNICAL SKILLS

Backend PHP, Laravel, REST APIs, Eloquent ORM, MVC, Authentication, Queues & Jobs, Webhooks, API Integration
Frontend Blade, React.js, Next.js, JavaScript, TypeScript
Databases MySQL, Microsoft SQL Server, SQL Optimization, Indexing, Joins, Raw SQL
Architecture OOP, SOLID, Service/Repository Pattern, API Versioning, Design Patterns
Testing PHPUnit, Unit Testing, Feature Testing, API Testing
Search Meilisearch, Algolia
Tools & CI/CD Git, GitHub, Postman, Composer, PHPUnit, Claude, GitHub Copilot, Cursor
Payments & Shipping Stripe, PayPal, Crypto.com, FedEx, USPS, ShipStation

PROFESSIONAL EXPERIENCE

MindBlaze Technologies Lahore, Pakistan

Software Engineer · Full-time

Sep 2024 – Present

- Reduced production product-detail API response time from ~6 seconds to ~1.5 seconds for a system with approximately 6,000 products and 1,000+ users by optimizing database queries, eager loading, selected columns, API payloads, and image handling.
- Migrated product search from Algolia to self-hosted Meilisearch across approximately 6,000 products, implementing indexes, autocomplete, typo tolerance, synonyms, filters, and facets; reduced search response time from approximately 3–4 seconds to 2–2.5 seconds and eliminated approximately \$100/month in recurring search costs.
- Designed and implemented Service/Repository-based Laravel architecture for product, order, and user domains, separating business logic, data access, and application responsibilities.
- Implemented Stripe, PayPal, and Crypto.com payment integrations, including payment processing, webhook handling, signature validation, synchronization, and idempotency for marketplace transactions.
- Integrated FedEx, USPS, and ShipStation shipping workflows for marketplace order fulfillment and shipment operations.
- Built Laravel queues and background jobs for order processing, shipment workflows, label generation, exports, notifications, and search indexing, moving long-running operations out of synchronous request cycles.
- Optimized database-heavy workflows using indexing, joins, eager loading, raw SQL, query optimization, and targeted caching for dashboards and frequently accessed operations.
- Developed React and Next.js features with TypeScript, integrating Laravel APIs for authenticated dashboards, forms, validation, searchable and paginated listings, and reusable UI components.
- Wrote unit, feature, and API tests using PHPUnit and contributed to production debugging, refactoring, code reviews, API versioning, scheduled jobs, and GitHub Actions CI/CD workflows.

6th Sense Technologies Lahore, Pakistan

Junior Software Developer · Full-time

Jan 2024 – Sep 2024

- Promoted from PHP/Laravel Developer Intern to Junior Software Developer within approximately four months based on performance and increasing development responsibility.
- Developed and maintained PHP/Laravel features and REST APIs across internal and client-facing web applications.
- Worked on the admin side of an attendance management system, resolving application issues and implementing new features to support attendance administration and day-to-day management workflows.
- Developed and maintained the admin side of a blogging platform, implementing PHP/Laravel functionality, administrative workflows, and database-driven features.
- Contributed to a Laravel-based e-commerce platform, working on application features, backend functionality, and database operations.
- Participated in debugging, issue resolution, refactoring, code reviews, API development, and Agile development activities.

PHP/Laravel Developer Intern · Internship

Sep 2023 – Dec 2023

- Developed PHP/Laravel features and resolved application issues in production-oriented web applications.
- Worked with senior developers on API development, database operations, debugging, and code improvements.

SELECTED PROJECTS

Mallshark — Multi-Vendor E-commerce Platform · *Laravel, MySQL, REST APIs, Meilisearch, Stripe, Crypto.com, FedEx, USPS, ShipStation*

- Developed backend functionality for products, orders, payments, payouts, shipping, analytics, and marketplace operations using Laravel and REST APIs.
- Implemented payment and shipping workflows, webhooks, queued operations, authentication, and product search using Meilisearch.

Employee Management System (EMS) — HR Platform · *Laravel, REST APIs, Next.js, React, TypeScript*

- Developed tender and bid management workflows with multi-level approvals and role-based access control.
- Implemented administrative and data-management features for workflow-driven operations.

Textile Souk — B2B Marketplace · *Laravel API, Next.js, Firebase*

- B2B textile marketplace featuring products, orders, inquiries, shipments, cargo management, Firebase notifications, and RESTful APIs.

Weblogr — Blogging Platform · *Core PHP, MySQL, JavaScript*

- Full-stack blogging platform with authentication, post CRUD, categories, comments, likes, search, pagination, notifications, and admin moderation, implementing Google OAuth 2.0/OpenID Connect with Proof Key for Code Exchange (PKCE), secure session handling, CSRF protection, and layered architecture.

EDUCATION

Virtual University of Pakistan — BS Computer Science · Oct 2020 – Oct 2024 · CGPA 3.38 / 4.0
