

MUHAMMAD TALHA

Software Engineer | PHP Laravel Developer

Allama Iqbal Town, Lahore, Pakistan | +92 340 3409744 | muhammadtalha.codes@gmail.com | [Portfolio](#) | [GitHub](#)

SUMMARY

Software Engineer with hands-on experience designing scalable, secure web applications and API-first architectures using PHP, Laravel and React.js. Experienced across e-commerce, B2B marketplace, and HR platforms, with expertise in modular architectures, MVC patterns, SOLID principles, MySQL, third-party integrations, payment gateways, queued jobs, and API authentication. Skilled in integrating shipping providers, search solutions, and external services, while collaborating with frontend, mobile, and cross-functional teams to deliver scalable, maintainable software solutions.

TECHNICAL SKILLS

Backend PHP, Laravel, REST APIs, MVC, Eloquent ORM, Queues & Jobs, Webhooks, Algolia, Meilisearch
Core CS Data Structures & Algorithms, OOP, SOLID Principles, Design Patterns
Databases MySQL, PostgreSQL, Microsoft SQL Server
Frontend Blade, JavaScript, Bootstrap, HTML, React.js, Ajax
Integrations Stripe, PayPal, Crypto.com, Firebase, FedEx, USPS, ShipStation, Google, Apple, Facebook
Tools Git, GitHub, Postman, Composer, PHPUnit, Claude, GitHub Copilot, Cursor

EXPERIENCE

MindBlaze Technologies Lahore, Pakistan · On-site

Software Engineer · Full-time

Sep 2024 – Present

- Develop scalable Laravel applications and features for e-commerce, B2B marketplace, and HR platforms using modular architectures based on MVC patterns and SOLID principles.
- Develop and secure RESTful APIs using Sanctum, Passport, and JWT authentication.
- Integrate payment gateways (Crypto.com, Stripe, PayPal) and handle webhooks to keep orders and payments in sync.
- Develop queued jobs to power emails, exports, Shopify product imports, search indexing, and Firebase push notifications, improving application scalability and reliability.
- Migrated product search from Algolia to self-hosted Meilisearch, improving search speed and removing recurring third-party search subscription costs.
- Develop Blade interfaces, write PHPUnit tests, troubleshoot complex production issues, participate in code reviews to deliver reliable, maintainable software within the Agile sprint cycle.
- Leverage AI-assisted development tools, including ChatGPT, Claude, and GitHub Copilot, to accelerate debugging, architectural design, code reviews, documentation, and feature development while maintaining high code quality.

6th Sense Technologies Lahore, Pakistan · Hybrid

Junior Software Developer · Full-time

Jan 2024 – Sep 2024

- Built PHP and Laravel features and business solutions for real-world client projects.
- Developed and consumed RESTful APIs and worked with third-party integrations.
- Collaborated with cross-functional teams in an Agile development environment.
- Strengthened problem-solving and software development skills through hands-on delivery.

PHP/Laravel Developer Intern · Internship

Sep 2023 – Dec 2023

- Assisted in developing Laravel features, fixing bugs, and learning industry-standard development practices within an Agile team.

PROJECTS

Mallshark — E-commerce Platform · *Laravel, Blade, MySQL, Meilisearch*

Package-based e-commerce backend with RESTful APIs, Sanctum auth, Stripe and Crypto.com payments with webhooks, queued jobs, and Meilisearch search, with a Blade-based admin panel for catalog, orders, and analytics.

Employee Management System (EMS) — HR Platform · *Laravel API, Next.js (React)*

HR platform for employee records, attendance, and admin operations, built on a Laravel API with Sanctum authentication.

Pak Railways Tender Workflow Management System — Enterprise Workflow System · *Laravel*

Workflow automation with multi-level approvals, bid management, RBAC, search, and interactive DataTables.

Textile Souk — B2B Marketplace · *Laravel API, Next.js*

B2B textile marketplace featuring products, orders, inquiries, shipments, cargo management, Firebase notifications, and RESTful APIs.

Door To Door and Fresco Canada — E-commerce Platforms · *Laravel, Blade, MySQL*

E-commerce platforms with Blade-based admin dashboards for product management, order processing, online payments, and analytics.

Weblogr — Blogging Platform · *Core PHP, MySQL, JavaScript*

Full-stack blogging platform with authentication, post CRUD, categories, comments, likes, search, pagination, notifications, and admin moderation, implementing Google OAuth 2.0/OpenID Connect with Proof Key for Code Exchange (PKCE), secure session handling, CSRF protection, and layered architecture.

EDUCATION

Virtual University of Pakistan — BS Computer Science · Oct 2020 – Oct 2024 · CGPA 3.38 / 4.0

- Strong foundation in Software Engineering, Database Systems, Object-Oriented Programming, Data Structures & Algorithms, and Web Engineering.
- Developed **Weblogr** as a Final Year Project using Core PHP, MySQL, JavaScript, HTML, and CSS.
